TOUCHLESS® PLUS

INTERMITTENT CATHETER SYSTEM

Leading the way
to independence

UROLOGY

BARD | MEDICAL

Trust

Bard works closely with leading urologists to develop innovative products that enhance patient safety, convenience and ease of use. We are committed to using superior materials, then engineering them for the comfort and reliability needed to lead a life of independence.

Bard has been a leader in urology since 1907, and remains the product of choice for hospitals, rehabilitation facilities and consumers. With a broad range of products that set the standard for quality and innovation, Bard is dedicated to developing products that improve patient care and reduce costs associated with urinary tract infections.

Trust the choice of medical professionals.

Ease of Use

Easy to insert, easy to use, easy to remove – the features needed to enhance convenience and usage.

- Catheter cap has pull ring for easy removal – especially for people with limited dexterity.
- Pre-lubricated catheter reduces discomfort during insertion.
- Large 1100cc collection bag is durable, virtually eliminating the risk of leaks.

Safety

The Bard® Touchless® Plus Intermittent Catheter System is a closed system, designed to help reduce the risk of urinary tract infections.

- Insertion tip positions the catheter in the urethra, bypassing the meatus to help reduce UTIs.
- Catheter guide allows control of catheter insertion with the touch of a finger.
- Tapered neck design decreases excoriation associated with sharp corners.

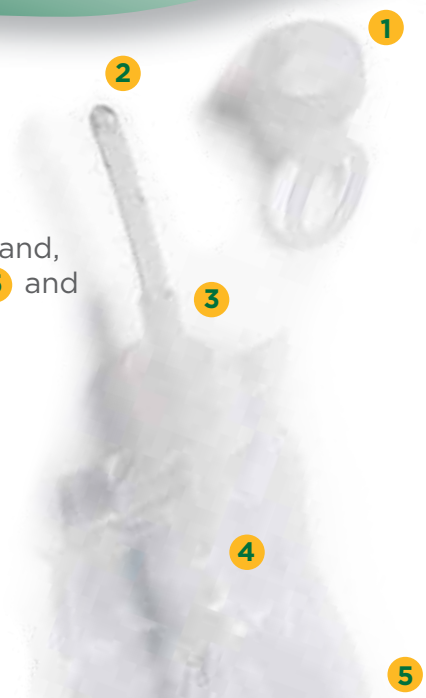

Sterile, Easy to Use:

1. Remove cap 1 from insertion tip using pull ring.
2. Slide the pre-lubricated catheter 2 halfway into the insertion tip 3 and insert into urethra.
3. Holding the patented guide 4 with non-dominant hand, use dominant hand to grasp catheter through bag 5 and push catheter into urethra.
4. Once bag is filled, withdraw catheter through insertion tip, snap on cap and dispose.

Complete instructions for use included in product packaging.

Your System, Your Choice

- Choice of red rubber or vinyl catheters based upon your preference and needs.
- Variety of catheter sizes, and available with or without accessories.
